PROFESSIONAL SUMMARY

Third-year Computer Science student at Lebanese University with a self-taught foundation in HTML, CSS, JavaScript, responsive design, and REST API integration (fetch, async/await), built through independent study and hands-on personal projects. Comfortable with Java, C, and basic Python, and currently expanding into React, Node.js, Bootstrap, and Tailwind CSS. Motivated to secure a Front-End Development internship to apply web development skills, learn from experienced engineers, and contribute to real production code.

EDUCATION

Bachelor's Degree in Computer Science

Sep 2024 - Jun 2027 (Expected)

Lebanese University - Beirut, Lebanon

- Currently in 3rd year

TECHNICAL SKILLS

- **Web Development:** HTML5, CSS3, JavaScript, Responsive Design
- **APIs & Integration:** RESTful APIs, fetch, async/await, Geolocation API
- **Programming Languages:** JavaScript, Java, C, Python (basic)
- **Tools & Version Control:** Git, GitHub, GitHub Pages, GitHub Actions, VS Code, Command Line
- **Currently Learning:** React, Node.js, Bootstrap, Tailwind CSS

PROJECTS

Personal Portfolio Website | Technologies: HTML, CSS

[Live Demo](#) | [GitHub](#)

- Designed and developed a responsive personal portfolio website to showcase skills and projects
- Structured semantic HTML sections and applied CSS styling for a clean, professional interface

Weather App | Technologies: HTML, CSS, JavaScript, OpenWeatherMap API

[Live Demo](#) | [GitHub](#)

- Built a responsive weather application that fetches real-time weather data using the OpenWeatherMap API
- Implemented geolocation-based weather lookup and dynamic UI updates, including background and icon changes based on current conditions
- Added a Celsius/Fahrenheit toggle and sunrise/sunset display to enhance the user experience
- Deployed via a GitHub Actions pipeline that injects the API key securely at build time, keeping credentials out of source control

Login & Sign-Up System | Technologies: HTML, CSS, JavaScript

[Live Demo](#) | [GitHub](#)

- Designed and developed a multi-page authentication interface including sign-up, login, and password-reset flows
- Implemented client-side form validation, a live password-strength indicator, and a random password generator
- Styled the interface with custom CSS animations and a responsive, glassmorphism-inspired design
